DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to control cover, classified in class 422, subclass 99.
 - II. Claims 14-19, drawn to a clinical analyzer, classified in class 422, subclass 63.
 - III. Claim 20, drawn to a method of controlling evaporation, classified in class 436, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the clinical analyzer as claimed does not require the particulars of the control cover as claimed, such as rollers. The cover can be used as a substrate.
3. Inventions III and I, II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus

Art Unit: 1743

as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by hand.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Todd Burns on 02/15/07 to request an oral election to the above restriction requirement, but did not result in an election being made.
